# Franklin International

# **Safety Data Sheet**

**Titebond Instant Wood Bond Thick** 

### **Section 1. Identification**

GHS product identifier	: Titebond Instant Wood Bond Thick
Chemical name	: ethyl 2-cyanoacrylate
Other means of identification	: 2-Propenoic acid, 2-cyano-, ethyl ester; Ethyl cyanoacrylate; Ethyl-2-cyanoacrylate; ethyl 2-cyanoprop-2-enoate; ECA; ethyl-2-cyano-2-propenoate; 2-propenoic acid 2-cyano ethyl ester; acrylic acid 2-cyano ethyl ester; 2-CYANOETHYL ACRYLATE; Ethyl alpha- cyanoacrylate; 2-Cyanoacrylic acid, ethyl ester
Physical state	: Liquid.
CAS #	: 7085-85-0
Address	: Franklin International 2020 Bruck Street Columbus OH 43207
Contact person	: Franklin Technical Services
Telephone	: (800) 877-4583
In case of emergency	: Franklin Security (614) 445-1300
e-mail address of person responsible for this SDS	: SDS@FranklinInternational.com
Reference number	: 00
Product code	: 6222
Date of revision	: 4/24/2018
Safety Data Sheets are available online at	: www.FranklinInternational.com
Chemtrec (24 Hour)	: (800) 424 - 9300
Chemtrec International	: (703) 527 - 3887
Chemical family	Adhesive.
Delete state of the state of the state of the	the sector between the sector and the sector and the sector at

Relevant identified uses of the substance or mixture and uses advised against

Not applicable.

# Section 2. Hazards identification

OSHA/HCS status	This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).	
Classification of the substance or mixture	FLAMMABLE LIQUIDS - Category 4	
GHS label elements		
Signal word	Warning	
Hazard statements	Combustible liquid.	
Precautionary statements		
Prevention	Wear protective gloves. Wear eye or face protection. Keep away from flames and hot surfaces No smoking.	
Response	Not applicable.	
Storage	Store in a well-ventilated place. Keep cool.	
Date of issue/Date of revision :	24/2018 Version : 1 1/	11

# Section 2. Hazards identification

#### **Disposal**

: Dispose of contents and container in accordance with all local, regional, national and international regulations.

\_\_\_\_

# Hazards not otherwise classified

# Section 3. Composition/information on ingredients

Substance/mixture	: Substance	
Ingredient name		%

: None known.

Ingredient name	%	CAS number	
ethyl 2-cyanoacrylate	75 - 100	7085-85-0	

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

# Section 4. First aid measures

Description of necessary	<u>r first aid measures</u>	
Eye contact	<ul> <li>Immediately flush eyes with plenty of water, occasionally l eyelids. Check for and remove any contact lenses. Conti minutes. Get medical attention if irritation occurs.</li> </ul>	
Inhalation	: Remove victim to fresh air and keep at rest in a position c not breathing, if breathing is irregular or if respiratory arres respiration or oxygen by trained personnel. It may be dan aid to give mouth-to-mouth resuscitation. Get medical atte persist or are severe. If unconscious, place in recovery po attention immediately. Maintain an open airway. Loosen tie, belt or waistband. In case of inhalation of decomposit symptoms may be delayed. The exposed person may ne- surveillance for 48 hours.	st occurs, provide artificial gerous to the person providing ention if adverse health effects osition and get medical tight clothing such as a collar, ion products in a fire,
Skin contact	: Wash contaminated skin with soap and water. Remove c shoes. Get medical attention if needed. Wash clothing be thoroughly before reuse.	
Ingestion	: Wash out mouth with water. Remove dentures if any. Rekeep at rest in a position comfortable for breathing. If may the exposed person is conscious, give small quantities of exposed person feels sick as vomiting may be dangerous unless directed to do so by medical personnel. If vomiting kept low so that vomit does not enter the lungs. Get medie effects persist or are severe. Never give anything by mou If unconscious, place in recovery position and get medical Maintain an open airway. Loosen tight clothing such as a	terial has been swallowed and water to drink. Stop if the . Do not induce vomiting g occurs, the head should be ical attention if adverse health th to an unconscious person. I attention immediately.
Most important symptom	ns/effects, acute and delayed	
Potential acute health e	ffects	
Eye contact	: This product may irritate eyes upon contact.	
Inhalation	: No known significant effects or critical hazards.	
Skin contact	: No known significant effects or critical hazards.	
Ingestion	: No known significant effects or critical hazards.	
Over-exposure signs/sy	<u>/mptoms</u>	
Eye contact	: No specific data.	
Inhalation	: No specific data.	
Skin contact	: No specific data.	
Date of issue/Date of revision	: 4/24/2018	Version : 1 2/11

# Section 4. First aid measures

Ingestion	: No specific data.
Indication of immediate med	dical attention and special treatment needed, if necessary
Notes to physician	<ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.</li> </ul>
Specific treatments	: No specific treatment.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.
See toxicological informatic	n (Section 11)

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

<u>Extinguishing media</u>	
Suitable extinguishing media	: Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.
Unsuitable extinguishing media	: Do not use water jet.
Specific hazards arising from the chemical	: Combustible liquid. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide nitrogen oxides
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## Section 6. Accidental release measures

Personal precautions, protect	tiv	e equipment and emergency procedures
For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	:	If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods and materials for co	nt	ainment and cleaning up
Small spill	:	Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste

disposal container. Dispose of via a licensed waste disposal contractor.

### Section 6. Accidental release measures

Large spill	: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.
	information and Section 13 for waste disposal.

# Section 7. Handling and storage

Precautions for safe handling	1	
Protective measures	:	Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Empty containers retain product residue and can be hazardous. Do not reuse container.
Advice on general occupational hygiene	:	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	:	Store between the following temperatures: -15 to 25°C (5 to 77°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

# Section 8. Exposure controls/personal protection

#### **Control parameters**

### Occupational exposure limits

Ingredient name	Exposure limits
ethyl 2-cyanoacrylate	ACGIH TLV (United States, 3/2017).
	TWA: 0.2 ppm 8 hours.
	OSHA PEL 1989 (United States, 3/1989). Absorbed through skin.
	TWA: 5 mg/m³, (as CN) 8 hours.
	OSHA PEL (United States, 6/2016). Absorbed through skin.
	TWA: 5 mg/m <sup>3</sup> , (as CN) 8 hours.
ethyl 2-cyanoacrylate	ACGIH TLV (United States, 3/2017).
	TWA: 0.2 ppm 8 hours.
	OSHA PEL 1989 (United States, 3/1989). Absorbed through skin.
	TWA: 5 mg/m³, (as CN) 8 hours.
	OSHA PEL (United States, 6/2016). Absorbed through skin.
	TWA: 5 mg/m³, (as CN) 8 hours.

# Section 8. Exposure controls/personal protection

•	• •
Appropriate engineering controls	: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.
Environmental exposure controls	: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
Individual protection measu	<u>res</u>
Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.
Skin protection	
Hand protection	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Body protection	: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

# Section 9. Physical and chemical properties

<u>Appearance</u>	
Physical state	: Liquid.
Color	: Straw.
Odor	: Acute and Irritant odor. [Strong]
Odor threshold	: Not available.
рН	Not applicable.
Melting point	: -31°C (-23.8°F)
Boiling point	: >100°C (>212°F)
Flash point	: Closed cup: 82.5°C (180.5°F)
VOC (less water, less exempt solvents)	: 20 g/l
	Not available.

### Section 9. Physical and chemical properties

Vapor pressure	: <0.067 kPa (<0.5 mm Hg) [room temperature]
Relative density	: 1.1
Solubility	: Insoluble in the following materials: cold water and hot water.
Solubility in water	: 0 g/l
Auto-ignition temperature	: 480°C (896°F)
Viscosity	: Dynamic (room temperature): 2.6 mPa·s (2.6 cP)

# Section 10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition.
Incompatible materials	: Reactive or incompatible with the following materials: oxidizing materials
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

# Section 11. Toxicological information

### Information on toxicological effects

### Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
ethyl 2-cyanoacrylate	LC50 Inhalation Vapor LD50 Oral	Rat Rat	21110 mg/m <sup>3</sup> >5000 mg/kg	1 hours
ethyl 2-cyanoacrylate	LC50 Inhalation Vapor	Rat	21110 mg/m <sup>3</sup>	1 hours
	LD50 Oral	Rat	>5000 mg/kg	-

### Irritation/Corrosion

Product/ingredient name	Result	Species	Score	Exposure	Observation

#### Toxicity

Not available.

### Persistence and degradability

Not available. **Bioaccumulative potential** Not available.

Mobility in soil	
Soil/water partition coefficient (Koc)	: Not available.
Other adverse effects	: No known significant effects or critical hazards.

# Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

# Section 14. Transport information

	DOT Classification	TDG Classification	Mexico Classification	ADR/RID	IMDG	ΙΑΤΑ
UN number	Not regulated.	Not regulated.	Not regulated.	Not regulated.	Not regulated.	Not regulated.
